

Engage the temporary works experts

In today's complex world of project delivery, it pays to have an experienced partner on your team.

Coates Engineering Solutions specialise in temporary works, from structural propping and hydraulic shoring to pumps and fluid management.

Our turnkey approach gives you access to Australia's largest equipment range and a multidisciplinary team of engineers, designers, project managers and installation experts to ensure your project runs smoothly from start to finish.

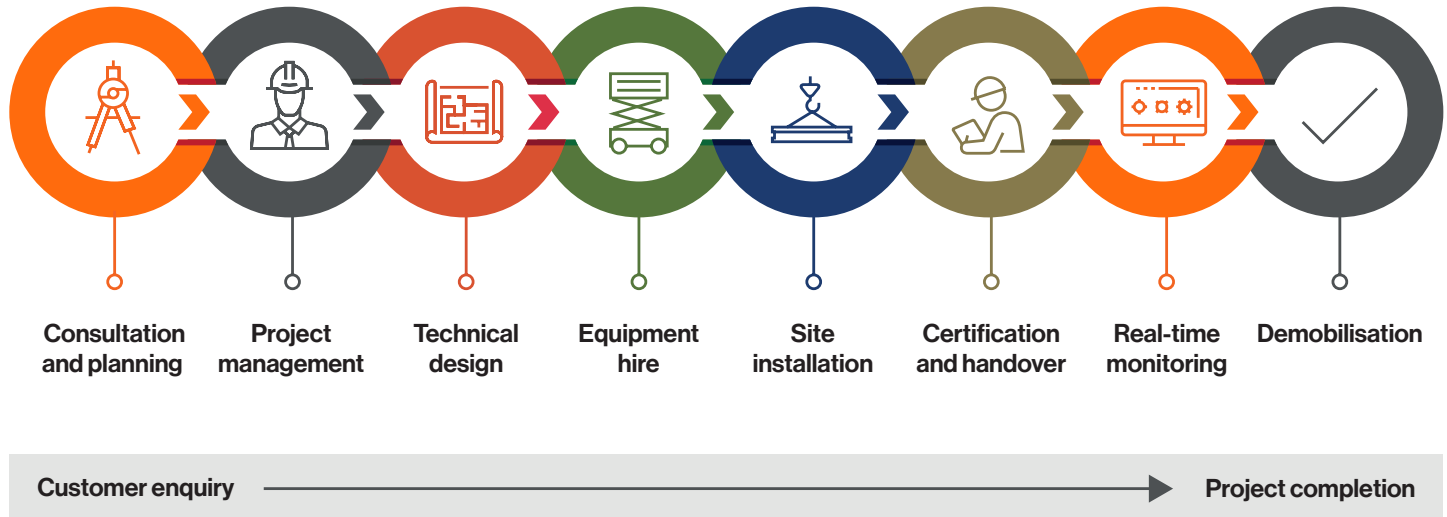

Coates

ENGINEERING SOLUTIONS

Trusted single source

Experience the peace of mind that comes with having a single point of accountability to manage equipment hire and engineering services – all under one purchase order.

From initial consultation to project completion, we'll work with your team to deliver a safe, practical and cost-effective solution.

Discover our turnkey solutions

Engineering Design & Installation

Turnkey solutions for temporary works projects, including project management, technical design, installation, certification and real-time monitoring.

Pumps & Fluid Management

Water solutions to manage dewatering and fluid transfers, including design, installation, project management and monitoring.

Water Treatment

Specialist team of environmental and chemical engineers to design, commission, operate and monitor compact systems to tackle contaminated water.

Structural Propping

Australia's largest range of propping equipment, from lightweight Titan Super props to our Universal System with up to 150 tonne capacity.

Synchronous Hydraulic Jacking

A heavy-duty alternative to other jacking systems for high precision lifting or lowering of large and heavy structures.

Hydraulic Shoring

Australia's largest range of hydraulic strut and bracing systems, with strut capacities up to 250 tonne and unsupported spans up to 40 metres for major excavation works.

Heavy Duty Ground Shoring

Versatile and robust ground support systems for all site conditions, including steel shoring boxes and slide rail.

Sheet & Brace

Flexible sheet piling solutions for all kinds of temporary works projects, including full design, installations and certifications.
